Constantly improving the experience of developers and dialogue with the masters allows to achieve the perfect balance of accuracy, ergonomics and high quality. The machine is completely ready for work! For proper operation with the machine, carefully read the instructions!

The package includes a tattoo machine, technical grease oil, warranty card, instructions, storing cover..

Using: the universal ELEMENT 2 tattoo machine is intended for drawing a contour, a shade, shadows.

Performance data

- Engine 6-12 V
- Optimal voltage 5-7 V
- Power plug - RCA
- Needle stroke 4.3 mm
- Weight 120 g

Stable power is responsible for the safety and quality of the result. We recommend using wires with a cross section of at least 0.75 mm, power supplies with an output current of at least 3A.

Important security measures

- ✓ The machine is intended for professional use only by tattoo artists. The manufacturer is not responsible for the improper operation of the equipment and its parts, also for non-compliance with sterilization and disinfection standards
- ✓ Use disposable cartridges, tips, needles. Before and after use, wipe the machine with a disinfectant
- ✓ Be sure to use barrier protection for the machine, power supply and cord clip.
- ✓ Always use disposable gloves during the session.

Care and maintenance

- ✓ Disinfection of the holder, assembling and disassembling of the machine should be carried out with disposable gloves. Before changing the needle or cartridge, disconnect the machine from the power supply.
 - ✓ It is recommended to carry out troubleshooting and replacement work at a service center. More information about service and maintenance can be found on the website <http://mustang-tattoo.ru/>. As part of the warranty, repairs are provided free of charge.
 - ✓ We recommend regular lubrication of parts. To do this, use the oil from the kit. The use of other oils may cause blockage and / or shorten the life of the machine.
 - ✓ Do not sterilize machines in an autoclave or a dry oven!
 - ✓ Non-disposable holders should be pre-sterilized in alaminol, and in dry oven or autoclave after.
-

Warranty

The warranty for the case (corpus) is 5 years, for the working parts of the machine (engine, welding, power plugs, lock) - 1 year.
